

Build a

Bug House

2008 Summer Reading Program

Catch the Reading Bug!

People around the world keep bugs as pets, to help in the garden, or even (gulp) as food. Award-winning writer and crafts designer Kathy Ceceri will show kids how to make cricket cages, ant farms, firefly lanterns and worm bins from recycled containers and crafts materials. Participants will learn how to catch bugs, how to care for them, and how to safely let them go. And everyone will get to make a quick-and-easy mesh butterfly cage to take home! Handouts with directions for all the projects shown, lists of books with fun bug facts and stories, and places to find more insect information online are included.

Kathy has presented workshops and classes at libraries and schools throughout upstate New York. Her crafts and articles appear in FamilyFun and Home Education magazines.

Here are the facts you need to book this exciting program in your library:

Where? Libraries in the Capital District/Saratoga/Adirondack area

When? Spring - Summer 2008

How long? One to two hours

How many people? Maximum 30 per session

Ages? 7 and up

Requirements? Tables, chairs and space to do an art activity, plus an adult helper.

Cost? \$200-\$350, including materials, handouts, and mileage.
